## Tundra Plants Activity Cards

This set of six tundra plant cards is an additional resource teachers can use with the ለጥናት ጥራት / *A Walk on the Tundra* book study. The cards can be used with two of the activities in the book study, or with the additional activities described here.

### Note to teachers

For some of the activities, students will work in pairs. You may not have enough sets of cards to give each pair of students a full set. Each pair does not need a full set of cards to complete the activities. You can divide the sets and distribute an equal number of cards to each pair. Make sure that pairs do not have more than one of the same card.

## ᐱᓕᓚᐱᓐᓴᓐᓂ: ᐃᓕᐱᓐ ᐱᓯᓐᓂᓂᓐ...?

### Activity: Which Plant...?

Organize students into pairs. Give each pair a set of cards. Have students look at the glossary of ᐱᓯᓐᓂᓂᓐ ᓯᓐᓴᓂᓐ / *A Walk on the Tundra*. Ask each of the questions provided below, one at a time. Students will look in the glossary for information about tundra plants. If students have a tundra plant card that fits the description in the question, they raise the plant card in the air. Choose one of the pairs with a card raised to answer the question with details about the plants.

- Which plants are used for medicine?
- Which plants can you eat?
- Which plants can be used for cooking?
- Which plants can be used to make tea?
- Which plants have flowers?
- Which plants grow on hillsides?
- Which plants should you wait until the end of the summer to pick?
- Which plants have more than one use (for example, eating, cooking, medicine)?
